

PROJECT DIARY

TEAM: 1

WEEK NUMBER : 1

Name	Lewis Mann
Estimated Hours Worked	20
Summary of work completed in the last week: Created the project using a Laravel project, helped others get basic project setup through GitHub	
Summary of work to be completed in the coming week: Setup the project page to use the Bing maps api to correctly display a map	
Issues and hurdles that may need addressing: SCSS and JavaScript are compiled incorrectly and need to be fixed so that bootstrap values and methods can be overwritten/added to	
Name	Ben Miles
Estimated Hours Worked	6
Summary of work completed in the last week: Set up the Laravel project on my home desktop and came to understand how to use GitHub with git bash to push and pull documents.	
Summary of work to be completed in the coming week: Assist in setting up the map page to correctly display the bing maps api	
Issues and hurdles that may need addressing: Had trouble setting up the project at the beginning making sure it was working ok for everyone	
Name	Andrea La Fauci De Leo
Estimated Hours Worked	8

Summary of work completed in the last week:

Setup basic Laravel project and started looking into using the bing maps api and using a laravel project.

As well as setting us up on GitHub and Git. Learned Atom as a platform to work cooperatively with the Team.

Discussed the Ideas for the project and picked one that appeals all team members.

Summary of work to be completed in the coming week:

Learn Database management for web Applications and PHP language.

Issues and hurdles that may need addressing:

Learning to use a laravel project can be challenging but with the help of the team i should be able to learn to use it.

Name	Aryan Prince
-------------	---------------------

Estimated Hours Worked	12
-------------------------------	-----------

Summary of work completed in the last week:

Started off with the initial set up for the Laravel project on my Windows machine, learnt the basics of how to use Git collaboratively with a team.

Summary of work to be completed in the coming week:

Sketch out a front-end UI / UX prototype for the website's homepage using Figma.

Issues and hurdles that may need addressing:

Initially had trouble setting up a local server and making sure project was running okay for everyone

Name	Mabel McDonald
-------------	-----------------------

Estimated Hours Worked	4
-------------------------------	----------

Summary of work completed in the last week:

Setup basic Laravel project and started looking into using the bing maps api and using a laravel project

Summary of work to be completed in the coming week:

Starting inserting various API and graphical interfaces.

Issues and hurdles that may need addressing:

Learning to use a laravel project can be challenging but with the help of the team i should be able to learn to use it

PROJECT DIARY

TEAM: 1

WEEK NUMBER : 2

Name	Lewis Mann
Estimated Hours Worked	10
Summary of work completed in the last week: learning about using laravel, starting to assign different tasks to people, small modifications to views	
Summary of work to be completed in the coming week: start working on a database to store user information, potentially more information such as users saved locations	
Issues and hurdles that may need addressing: database can only be done locally and individually potentially causing issues when other people want to work on it	
Name	Ben Miles
Estimated Hours Worked	10
Summary of work completed in the last week: Watched tutorial videos to better understand laravel and recapping on MySQL to create a secure and easily useable database	
Summary of work to be completed in the coming week: Continue to brush over tutorial videos so that we can start to build the back end of the website	
Issues and hurdles that may need addressing: Getting through the tutorial videos in a set timeframe whilst working is quite difficult, I will have to put in more hours but will hopefully still keep on track	
Name	Andrea La Fauci De Leo
Estimated Hours Worked	13
Summary of work completed in the last week: Watched tutorials regarding HTML, CSS, JavaScript to get started on the project and acquire basic knowledge to start being comfortable with web developing.	

Summary of work to be completed in the coming week:

Finishing to learn Laravel Framework and use the knowledge acquired in the previous weeks to start building a draft of the website with front-end team mates.

Issues and hurdles that may need addressing:

Understanding JavaScript was hard but I believe that with practice will come results. As well CSS and HTML were new topics.

Name	Aryan Prince
Estimated Hours Worked	12

Summary of work completed in the last week: Created a basic UI / UX prototype for front-end design, learning more about HTML/CSS/JS to improve web-development skills

Summary of work to be completed in the coming week: Finish up with basic tutorials online regarding HTML/CSS/JS and start working on the actual front-end of the project

Issues and hurdles that may need addressing: Learning curve for JavaScript was difficult at first, undecided on design and layout of project

Name	Mabel McDonald
Estimated Hours Worked	

Summary of work completed in the last week:

Summary of work to be completed in the coming week:

Issues and hurdles that may need addressing:

PROJECT DIARY

TEAM: 1

WEEK NUMBER : 3

Name	Lewis Mann
Estimated Hours Worked	10
Summary of work completed in the last week: Setup database tables and migrations, connected registration form to the database.	
Summary of work to be completed in the coming week: Setup login and logout sessions system and finish connecting forms to the database.	
Issues and hurdles that may need addressing: Database work can only be done locally and individually, potentially causing issues when other people want to work on it.	
Name	Ben Miles
Estimated Hours Worked	12
Summary of work completed in the last week: Used the MySQL website and laravel tutorial course to read over documentation of building tables in databases and encrypting data.	
Summary of work to be completed in the coming week: Continue to brush over tutorial videos so that we can continue to build the back end of the website.	
Issues and hurdles that may need addressing: Had some personal issues this week stopping me from doing as much work, hopefully this doesn't happen in upcoming weeks	
Name	Andrea La Fauci De Leo
Estimated Hours Worked	14
Summary of work completed in the last week: Finished watching Laravel tutorials. Started coding the Main Page of the website using HTML and CSS.	
Summary of work to be completed in the coming week: Finalise the main page and properties page as well as design of the front end part of the website.	

Issues and hurdles that may need addressing:

Understanding Laravel and how to import basic HTML and CSS in the framework. Need to understand how to use Laravel as it looks too advanced.

Name	Aryan Prince
Estimated Hours Worked	14

Summary of work completed in the last week:

Started development of the homepage and the login page using HTML/CSS/JS. Still progressing through the Laravel course.

Summary of work to be completed in the coming week:

Finish up the Laravel course, add additional functionality and improve the design of the webpage.

Issues and hurdles that may need addressing:

Laravel is complicated and will require me putting in more time to fully understand its usage and capabilities. JavaScript is also complex so I will have to put in more time to improve my skills.

Name	Mabel McDonald

PROJECT DIARY

TEAM: 1

WEEK NUMBER : 4

Name	Lewis Mann
Estimated Hours Worked	20
Summary of work completed in the last week: Made the decision to switch to be making an e-commerce site instead of LeftMove, and did some work on the main page.	
Summary of work to be completed in the coming week: Work on more pages so the backend can be worked on.	
Issues and hurdles that may need addressing: Emails need an email server.	
Name	Ben Miles
Estimated Hours Worked	7
Summary of work completed in the last week: Used YouTube tutorials to begin to learn how to develop a basic email system for the website.	
Summary of work to be completed in the coming week: Implement the code learned via tutorials into the website for testing.	
Issues and hurdles that may need addressing: I need to learn how to then add the email serve to the website and link it to the forget password page.	
Name	Andrea La Fauci De Leo
Estimated Hours Worked	12
Summary of work completed in the last week: Designed the main page and finished watching all the tutorials. Switched to an e-commerce website for games and PC components.	
Summary of work to be completed in the coming week:	

Finalise the main page code for front end and page as well as creating an appealing layout for the new website purposes.

Issues and hurdles that may need addressing:

We had to restructure our project switching from properties web-site to e-commerce because of the lack of free APIs.

Name	Aryan Prince
Estimated Hours Worked	12

Summary of work completed in the last week:

Redesign a new UI mockup and plan out the layout and functionality of the e-commerce platform.

Summary of work to be completed in the coming week:

Code a fully functional and working main homepage, along with adding some new pages to save products and more.

Issues and hurdles that may need addressing:

Designing a user-friendly e-commerce website interface can be difficult at first.

Name	Mabel McDonald
Estimated Hours Worked

PROJECT DIARY

TEAM: 1

WEEK NUMBER : 5

Name	Lewis Mann
Estimated Hours Worked	20
Summary of work completed in the last week: Helped make some frontend pages before beginning to build the backend, started helping Ben to get a local email server working but that's still in progress till the login page and all the other authentication pages are fixed.	
Summary of work to be completed in the coming week: Finish basics of all frontend pages and have all routes and controllers working with them.	
Issues and hurdles that may need addressing: Frontend and backend rely on each other as products are added to the product pages by looping over an array of objects.	
Name	Ben Miles
Estimated Hours Worked	10
Summary of work completed in the last week: Watched some YouTube tutorials to add a forgot password button and link it to a person's email.	
Summary of work to be completed in the coming week: Make the email server work.	
Issues and hurdles that may need addressing: Learn how to make an account verify function with emails.	
Name	Andrea La Fauci De Leo
Estimated Hours Worked	15
Summary of work completed in the last week: Fixed the navbar and Logo. Finished refining the main page and Games page. Refined the carousel buttons and made links to the right pages.	
Summary of work to be completed in the coming week:	

Starting the new Sprint backlog and revise for the Presentation	
Issues and hurdles that may need addressing: Nothing in particular.	
Name	Aryan Prince
Estimated Hours Worked	18
Summary of work completed in the last week: Created and populated all of the product pages with items. Made sure all the buttons on the website work properly.	
Summary of work to be completed in the coming week: Designing and preparing for the work in progress presentation.	
Issues and hurdles that may need addressing: Pulling data from an API to automatically fill in products with information will be challenging at first.	
Name	Mabel McDonald
Estimated Hours Worked	
Summary of work completed in the last week:

PROJECT DIARY

TEAM: 1

WEEK NUMBER : 6

Name	Lewis Mann
Estimated Hours Worked	20
Summary of work completed in the last week: prepared site for presentation and finished the presentation	
Summary of work to be completed in the coming week: focus on creating tables to store the the games based on apis for steam, gog and epic games, maybe also start being able to call those apis to fill the database tables and games frontend pages	
Issues and hurdles that may need addressing: epic games has a difficult api and may have to settle for a web scraper to just get the price for each game on that store	
Name	Ben Miles
Estimated Hours Worked	10
Summary of work completed in the last week: Made the forgot password section send emails to the user to begin to add the password reset system and rehearsed for the presentation	
Summary of work to be completed in the coming week: Watch videos to learn how to Code the section that once the forgot password button has been pressed it resets the password in the database	
Issues and hurdles that may need addressing: Need to work on different skills to be able to make a functioning and secure account reset and verification page	
Name	Andrea La Fauci De Leo
Estimated Hours Worked	13
Summary of work completed in the last week: Prepared the presentation's slides and finalized some work on the Navbar. Fixed few errors and set up working links for the Presentation branch.	

Summary of work to be completed in the coming week:	
Start working on the second Sprint creating new user Stories and tasks and getting into work on that.	
Issues and hurdles that may need addressing:	
Working on APIs is going to be new and challenging. It might be hard at the beginning	
Name	Aryan Prince
Estimated Hours Worked	10
Summary of work completed in the last week:	
Preparation for the work in progress presentation.	
Summary of work to be completed in the coming week:	
Work on implementing an API to automatically populate data for product listings.	
Issues and hurdles that may need addressing:	
First time working with an API so it might be challenging.	
Name	Mabel McDonald
Estimated Hours Worked	
Summary of work completed in the last week:	
Summary of work to be completed in the coming week:	
Issues and hurdles that may need addressing:	

PROJECT DIARY

TEAM: 1

WEEK NUMBER : 8

Name	Lewis Mann
Estimated Hours Worked	15
Summary of work completed in the last week: created tables to store games from steam	
Summary of work to be completed in the coming week: created basic API call to get data from steam	
Issues and hurdles that may need addressing: The API returns a lot of data and it will take a while to decide how it should be inserted into the database	
Name	Ben Miles
Estimated Hours Worked	10
Summary of work completed in the last week: Linked the forgot password page to the database	
Summary of work to be completed in the coming week: Make sure all the data is correct by testing the code	
Issues and hurdles that may need addressing: Working on logic assignment at same time	
Name	Andrea La Fauci De Leo
Estimated Hours Worked	15
Summary of work completed in the last week: Updated Taiga. Added a Search Bar which works front end, integrated inside the Navbar. Back end needs to fetch the right information from the query. Policy section in the About Footer section completed. Started the presentation and started working on the portfolio.	
Summary of work to be completed in the coming week:	

Finishing the portfolio and Presentation slides. Polishing the footer and about page. Also helping with the single product page. To update Taiga.

Issues and hurdles that may need addressing:

Challenging merging front-end and back-end content.

Name	Aryan Prince
Estimated Hours Worked	12

Summary of work completed in the last week:

API works with a small list of games stored in a database for now

Summary of work to be completed in the coming week:

Expand the functionality of the API to add more games, add an individual product page

Issues and hurdles that may need addressing:

Difficulty in implementing the API as I'm still learning how it works

Name	Mabel McDonald
Estimated Hours Worked

PROJECT DIARY

TEAM: 1

WEEK NUMBER : 9

Name	Lewis Mann
Estimated Hours Worked	20
Summary of work completed in the last week: created basic api call to get data from steam	
Summary of work to be completed in the coming week: finished api call to steam and now store all relevant data front he api int the database	
Issues and hurdles that may need addressing: the database has a lot of data now and it will be difficult to display it properly on the frontend	
Name	Ben Miles
Estimated Hours Worked	10
Summary of work completed in the last week: tested the code and it works	
Summary of work to be completed in the coming week: Create the email verification code when account is first made	
Issues and hurdles that may need addressing: Need to research how to do this	
Name	Andrea La Fauci De Leo
Estimated Hours Worked	12
Summary of work completed in the last week: Started working on the portfolio and presentation. Started designing the about footer section. Team section designed and ready to test.	
Summary of work to be completed in the coming week: Adding more section in the footer for the About sections. Privacy and company presentation to be added. To update Taiga, tasks and sprint accordingly. Adding a search bar.	

Issues and hurdles that may need addressing:

No issues to address.

Name	Aryan Prince
-------------	--------------

Estimated Hours Worked	10
-------------------------------	----

Summary of work completed in the last week:

Made a basic individual product page for games, started the Individual Report for the Team Project

Summary of work to be completed in the coming week:

Improve footer design and functionality

Issues and hurdles that may need addressing:

Storing and transferring the database with team members was difficult and time-consuming due to the large amount of data on it

Name	Mabel McDonald

PROJECT DIARY

TEAM: 1

WEEK NUMBER : 10

Name	Lewis Mann
Estimated Hours Worked	20
Summary of work completed in the last week: finished API call to steam and now store all relevant data front the api in the database	
Summary of work to be completed in the coming week: create game page to show pages of 20 games at once, create wishlist system to mark games as wishlisted for each user and create individual product pages for games	
Issues and hurdles that may need addressing: It will take more time to polish some pages	
Name	Ben Miles
Estimated Hours Worked	10
Summary of work completed in the last week: Found out how to add a verification step when creating an account	
Summary of work to be completed in the coming week: Worked on the presentation and taiga	
Issues and hurdles that may need addressing: 	
Name	Andrea La Fauci De Leo
Estimated Hours Worked	15
Summary of work completed in the last week: Updated Taiga. Added a Search Bar which works front end, integrated inside the Navbar. Back end needs to fetch the right information from the query.
